An extremely powerful vocalist that can go from powerful metal to climatic moments within the same track showing a lot of versatility in her voice. Tracks like "Where is te love" shows her voice in a different, more acoustic, context, kind of a dark ballad that fits her musical personality really well. The compositions are full of melodies but the main thing are Powerful riffs in tracks like "Change", my absolutely favorite track. And another trademark are the interesting choruses done with her own voice harmonized. She uses programmed drums that give a special feeling to the music too. Keep an eye on this amazing woman, her voice rules.
